

Zendocrine® Detoxification Complex

PRODUCT DESCRIPTION

dōTERRA Zendocrine Detoxification Complex is a proprietary blend of whole-food extracts in a patented enzyme delivery system that supports healthy cleansing and filtering functions of the liver, kidneys, colon, lungs, and skin.*

CONCEPT

As part of requisite body functions of eating, breathing, and coming in contact with our environment through our skin, our bodies are exposed to numerous toxins and environmental challenges. One of the primary functions of vital organs is to act as protective filters. The largest organ of the body, the skin, acts as a defensive barrier and gate keeper. The lungs help filter the air we breathe of particulates and pollutants. The gastrointestinal tract from the stomach to the colon also performs significant cleansing and filtering of toxins entering our bodies through the food we eat. If toxins make it past these organs on the first line of defense, other organs such as the kidneys and liver perform additional filtering functions.

The body's filtering and waste management system is quite capable of managing a certain amount of exposure to toxic influencers. But in a modern world of environmental pollutions and harmful chemicals found in prepared foods, beauty products, treated water, etc., the body's filtering system can be significantly challenged. Healthy organs have the capacity to meet this challenge under normal conditions, but many sub-optimal health conditions can challenge the healthy functioning of the liver, kidneys, colon, lungs, and skin.

Supporting healthy cleansing and filtering functions of these organs begins by limiting exposure to environmental toxins we breathe or touch and by eliminating foods that have artificial ingredients or that have been treated with pesticides and other harmful chemicals. Hydrating frequently with clean water is also essential for healthy function of our cleansing organs. Additionally, supplementing our healthy diets with functional nutrients that provide targeted support for specific organs can help maintain healthy cleansing and filtering functions of the body.*

dōTERRA Zendocrine® Detoxification Complex

dōTERRA Zendocrine is a proprietary blend of whole-food extracts formulated to support the healthy cleansing and filtering functions of the liver, kidneys, colon, lungs, and skin.* Each whole-food botanical extract was selected specifically to support organ capacity to both provide protective cleansing and filtering functions for the body and to support the organ's own capacity to rid itself of stored toxic waste products.* Zendocrine also uses an enzyme support system to help with whole-food extract absorption and is packaged in SLS-free vegetable capsule.

1

CPTG Certified Pure Therapeutic Grade®

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

PRIMARY BENEFITS

- Supports healthy cleansing and filtering functions of the liver, kidneys, colon, lungs, and skin*
- Supports normal self-detoxification functions of the cleansing organs*

DIRECTIONS FOR USE

Take two (2) capsules daily, one each with morning and evening meals. For optimal benefits, avoid increased toxic load to your organs via your food supply by reducing the amount of foods prepared with artificial colors, preservatives, and sweeteners, and by increasing your consumption of pure water throughout the day. Zendocrine's benefits can be enhanced by taking with Zendocrine Blend or Softgels.

CAUTIONS

Pregnant or nursing women and people with known medical conditions should consult a physician before using. Does not contain milk products. Does not contain ingredients made from animals. Store in a cool, dry place.
